

Our unique patented interlocking discs stop the wave's lateral movement and divert the force along the length of the lane. No other racing lane has this advanced system. The cable is 304 stainless steel with 2,000- lb. test strength. The tension reel is cast bronze fitted with a quick release device, hooks are stainless steel.

The "Classic" is made from 1 1/2" aluminum, the reel is supported on self-lubricating Nylatron bearings. Mounted on four wheels, the unit is easily moved fully-loaded and brakes automatically when set down. This reel holds 7-25 yards, 6-25 meter or 3-50 meter lanes.

The "Supreme" is anodized blue finish for optimum resistance to chemical, solar or environmental corrosion and comes with a vinyl-coated cover to protect lanes from the elements. The lane holding capacity same as "Classic". The "Supreme" has a five year warranty.
