Admiral S15 Skimmers

All Admiral skimmers are engineered to remove a strata of water from the pool or spa surface when connected to the suction side of a recirculating system.

Each skimmer has a floating weir to select the proper surface flow and a surge chamber in the body housing to retain a water supply for suction requirements of the system.

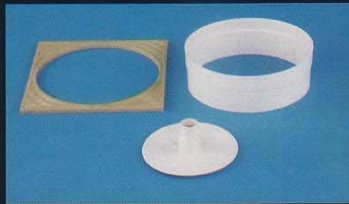

A basket is nested in the body housing to collect debris from the water surface.

1. Tamper proof lid
2. Adjustable collar
3. Skimmer body & throat
4. Circular weir

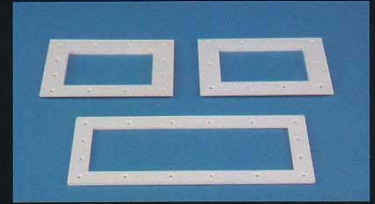

5. Pin for flap weir
6. Large basket
7. Equalizer assembly
8. Skimmer base (Vari-flo shown)

Accessories

1. Square ring seat allows the skimmer lid to fit into angular deck material.
2. Extension collars can be added to the skimmer body for raised decks.
3. Vacuum attachment lets you vacuum directly into the basket.

Vinyl Sealing Frames

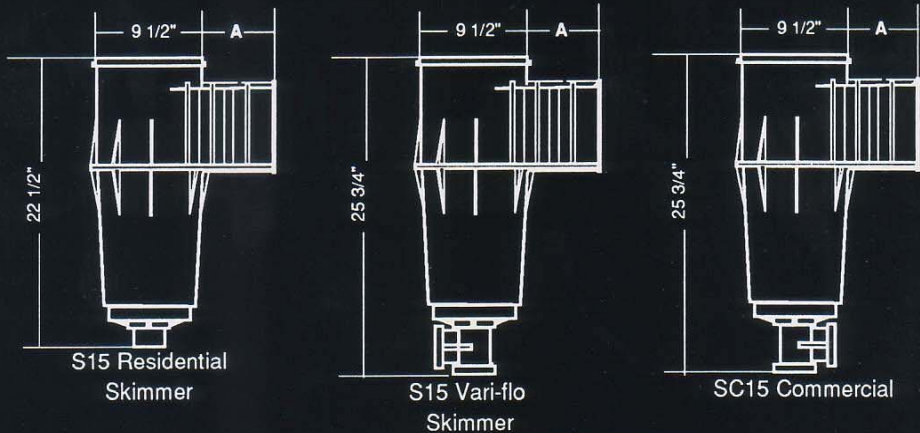

S15 Vinyl liner skimmers are available with American or standard hole pattern in long and short throat and wide mouth throat design.

The Admiral S15 line offers a versatile selection of skimmers for all plumbing applications.

The S15 residential is a single port skimmer for direct connection to the suction line of a recirculating system. S15 residential skimmers are available with 1 1/2" and 2" plumbing connections.

The Admiral S15 Vari-flo skimmers are unique in design. This skimmer can be connected to control flow from both the skimmer and the main drain line through a vari-flo valve in the base of the skimmer. Plumbing connections on Vari-flo skimmers are 1 1/2" FIPT x 2" Slip.

SC15 commercial skimmers are designed to NSF standards for commercial applications. This model has a "T" at the base with a suction and equalizer port. A float valve protects the circulation system against air entrainment. Plumbing connections on the SC15 skimmer are 1 1/2" FIPT x 2" Slip.

Skimmer	"A" Dimension
Gunite (no face plate)	5 9/16"
Short Throat	8 5/8"
Long Throat	13 1/2"
Wide Throat	13 1/2"

SC15 Skimmers are equipped with a float valve and adjustment sleeve in the bottom tee and are NSF listed components for commercial applications.
