

SideKick CHLORINATOR/BROMINATOR

Above Ground and Inground Pools

- **Performance dial setting** allows timed release of chlorine or bromine tablets, pucks, or sticks for more precise application control and less frequent maintenance.
- **Feeder installed with pool equipment** means less concentration of chlorine in the pool allowing for less potential for damage to pool surfaces and fittings and less exposure to children of large chlorine concentrations.
- **Bi-flow design** allowing for installation in either direction.
- **Model SK910 for above-ground or smaller in-ground pools features 10 settings** with 100% automatic shut-off. Provides 1-1/2" threaded ports or 1-1/2" standard union connections.
- **Model SK940 for larger pools features 10 settings and 180° dial** with off position and 2" threaded ports.

Note: Not for use with calcium Hypochlorite tablets or any granular chlorine.
